The screenshot shows a web-based application for web scraping. At the top, there's a navigation bar with links for Home, Scrapers, Login, Sign Up, and Log out. Below the navigation, a large light blue oval covers the central area. Inside the oval, the text "Web Scraper" is displayed next to a logo consisting of a hexagonal grid with a stylized 'W' shape. Below this, the text "Web Scraper App" is written in a stylized font, followed by the instruction "JUST PASTE THE URL AND START SCRAPING!" in red capital letters. The background of the application shows a code editor with several files open, including "RegisterController.php", "app.js", and "Vuex". The code in "app.js" includes imports for VueRouter, routes, store, vuexI18n, and enLangFile. The "Vuex" file shows a mutation for setting locale. The overall theme is dark, with the application's UI elements in light colors.
